

# ROADMAP

## Phase 1: Development & Launch (Now - Q4 2024)

### Platform Core Functionalities:

Designing a user-friendly interface, integrating AOC token subscriptions, establishing rental tools infrastructure, and fostering a robust developer network.

### Smart Contract Development:

Developing and meticulously auditing a secure smart contract for the AOC token to ensure compliance with relevant regulations.

### AOC Token Launch (Q4 2024):

Strategically introducing the AOC token to the market through a meticulously planned launch, marking a pivotal moment for The AI Oasis ecosystem.

### Beta Testing:

Soliciting invaluable user feedback through a closed beta program to refine functionalities, with a specific focus on seamless integration and user experience with the AOC token.

### Community Building:

Actively engaging with AI and developer communities through online forums, social media platforms, and industry events to highlight the value proposition and utility of the AOC token within the platform.

## Phase 2: Growth & Adoption (Q5 2024 - Long-term Vision)

### Platform Launch:

Officially unveiling The AI Oasis marketplace to the public, fully integrated with the AOC token for seamless transactions, rewards, and premium features.

### Diversity & Growth:

Onboarding a diverse array of pre-built AI models across various industries, alongside recruiting and vetting top-tier developers incentivized by the AOC token's utility and potential for value appreciation.

### User Acquisition:

Implementing targeted marketing campaigns to attract businesses, individual developers, and AI enthusiasts by showcasing the unparalleled benefits of utilizing the AOC token within the platform.

### Focus on Africa:

Customizing platform features and extending support to key African markets, alongside forging strategic partnerships with NGOs and government initiatives to bridge the AI knowledge gap and foster financial inclusion.

### Financial Inclusion in Africa:

Exploring partnerships with mobile money providers and collaborating with central banks to develop regulatory frameworks for AOC token usage within Africa's evolving financial ecosystem.

## Phase 3: Expansion & Innovation (Q1 2025 - Onwards)

### Content Tokenization (Q1 2025):

Integrate content tokenization protocols, allowing creators to offer tokenized content alongside AI models, enriching the platform's offerings and creating new revenue streams.

### Advanced Features:

Implementing AI-powered project management tools and reputation scoring systems to streamline workflows and foster trust within the developer community.

Ecosystem Development: Nurturing a dynamic AI ecosystem by empowering third-party developers and encouraging innovation within the marketplace, all fueled by the AOC token.

## Phase 4: Building the Future of African AI (Q5 2025 - Long-term Vision)

### Supporting African AI Startups:

Establishing dedicated programs and allocating resources to support African AI startups, fostering mentorship opportunities, providing funding avenues, and granting access to The AI Oasis platform to nurture innovation.

### AI Infrastructure for Africa:

Collaborating with governments, NGOs, and private partners to develop robust AI infrastructure across Africa, including high-performance computing resources and strategically located data centers.

### Ethical AI Development:

Embedding ethical considerations into all facets of The AI Oasis platform to promote responsible and transparent AI development in Africa.

## Phase 5: Custom AI/Robotics (Q1 2026)

### Deliver High-Impact Custom Projects in Africa:

Showcase successful deployments of custom AI/robotic models for government agencies and big businesses in

Africa, focusing on addressing critical challenges on the continent such as agriculture, healthcare, infrastructure, and security.

## Additional Targets:

Business Acquisition (Q4 2024 - Q4 2025):

Target Q4 2024: Onboard 1000+ businesses, develop targeted marketing & outreach campaigns and establish partnerships with technology consultants and solution providers.

Target Q3 2025: Onboard an additional 10000+ businesses, showcase real-world use cases through case studies and success stories, implement a referral program, develop industry-specific solutions and resources, and implement dedicated account management strategies for high-growth clients.

Target Q4 2025: Achieve a total of 5000+ active businesses.

Developer Training & Enablement:

Target Launch (Q4 2024): Establish a developer portal with resources such as tutorials & documentation, sample code & templates, and developer forums & communities.

Target Q2 2025: Launch developer training programs, host online and in-person introductory workshops, and offer advanced training modules.

Target Q4 2025: Achieve a community of 1,500+ active developers.
