

## OPERATIONAL DYNAMICS

AI Oasis is not just another AI platform. We're democratizing AI for all. We are empowering businesses and individuals on a global scale, with a special focus on the growing African market.

Our ecosystem revolves around user-Friendliness and affordability. We break down barriers to entry with seamless access to pre-built AI tools at the most affordable prices. This ecosystem thrives on

low-code/no-code customization, making AI accessible to everyone, regardless of technical expertise or budget.

An integral facet of the AI Oasis Ecosystem is to make AI a powerful tool for everyone, everywhere, establishing of user-friendly processes that facilitate easy access to AI tools. The objective is to transcend a market place to become a one-stop platform with core functionalities and market-specific features for maximized reach and impact. Driving collaboration between developers and businesses to create a comprehensive AI-driven landscape.

## CORE SERVICES:

Our core services include providing a on stop shop for pre-built user-friendly AI tools like customers service chatbots, marketing automation etc. for our users. Building a vast library of diverse rentable AI tools across different functionalities (e.g., image recognition, natural language processing) that users can rent on an hourly, daily, or monthly basis depending on their project needs.

Curating a network of skilled AI developers with expertise in diverse areas like machine learning, computer vision, and deep learning. Clients can hire these developers for custom projects or ongoing AI development needs.

AI Oasis Provides a comprehensive solution for all AI needs, eliminating the need to search for tools or developers elsewhere. The platform Prioritizes user-friendly and functional interfaces for both users and developers through a rigorous vetting process that ensures that services are provided on a premium. AI Oasis offers its users a variety of options with tiered pricing models for automated tools, rental plans for AI tools, and competitive rates for freelance developers and leveraging blockchain technology for a potentially more decentralized, secure, and transparent platform with its own native coin AI Oasis Coin (AOC).

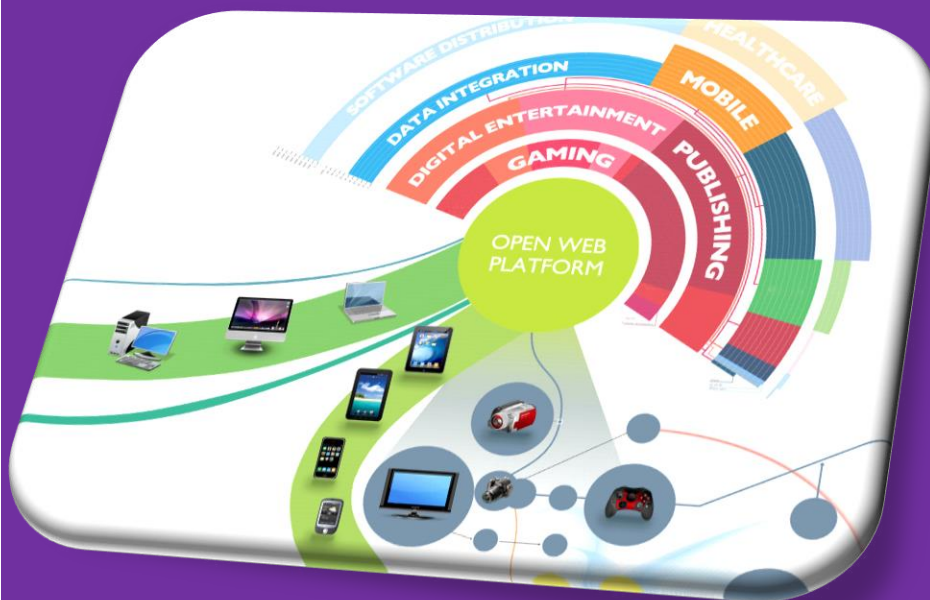

# AI OASIS MARKETPLACE:

The AI Oasis Marketplace embodies a dynamic platform for acquiring and renting AI tools spanning from art to music to entire virtual realms. This international hub caters to users, developer and businesses, enabling them to seamlessly engage in the exchange of their expertise. Individuals are required to register on the platform. Subsequently, developers can upload their creations, skills and AI tools to the AI Oasis Platform, presenting their work to a global audience. Transactions within the marketplace are conducted in \$AOC tokens, exemplifying our dedication to fostering a vibrant digital ecosystem.

# Open and accessible platform

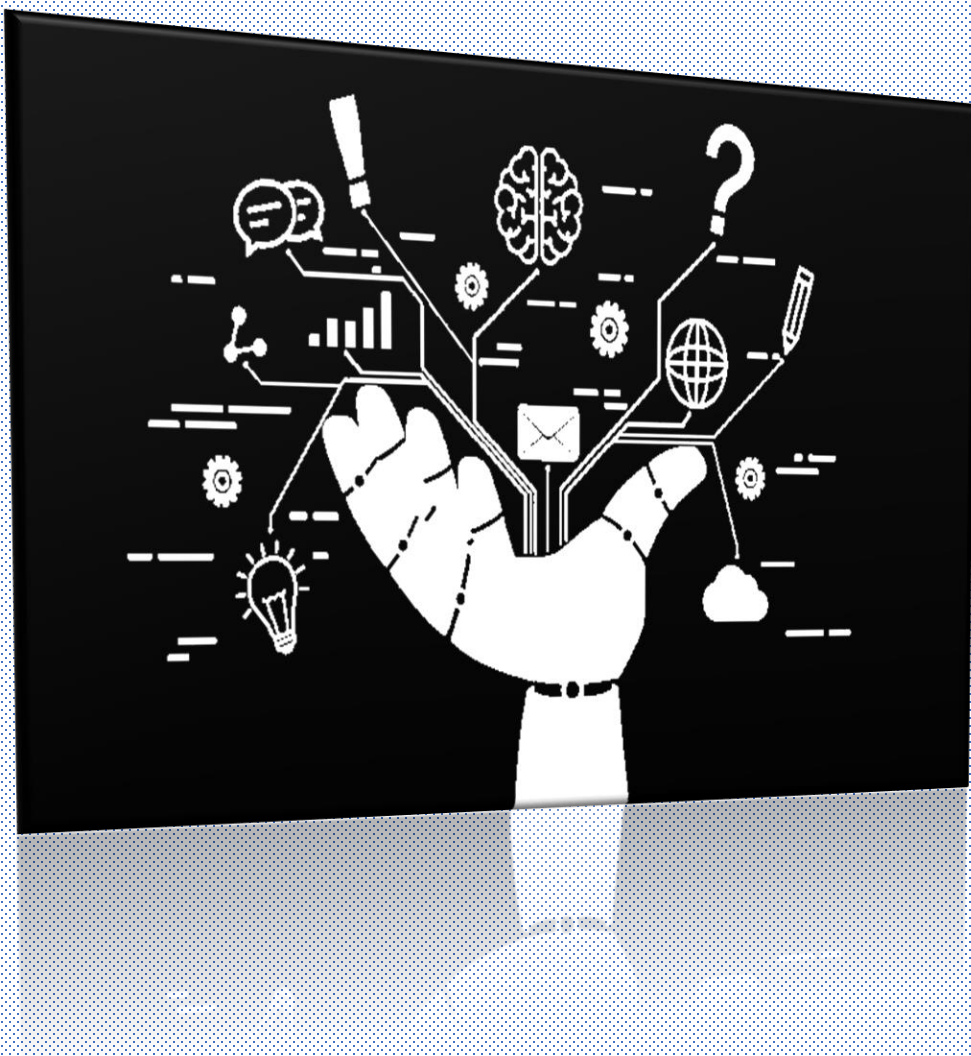

AI Oasis develops a clear and straightforward process for developers to submit their AI tools to the marketplace. This could involve a web form, an API integration, or a self-service portal. Creating a wide range of AI tool types, from simple scripts and modules to complex AI models. Providing clear guidelines and technical specifications for tool submission to ensure compatibility with the platform. Submitted tools are

reviewed to prioritize functionality, effectiveness, to ensure that users friendly experience over the developer's background or experience level.

## CURATED AI DEVELOPER NETWORK AND TOOLS

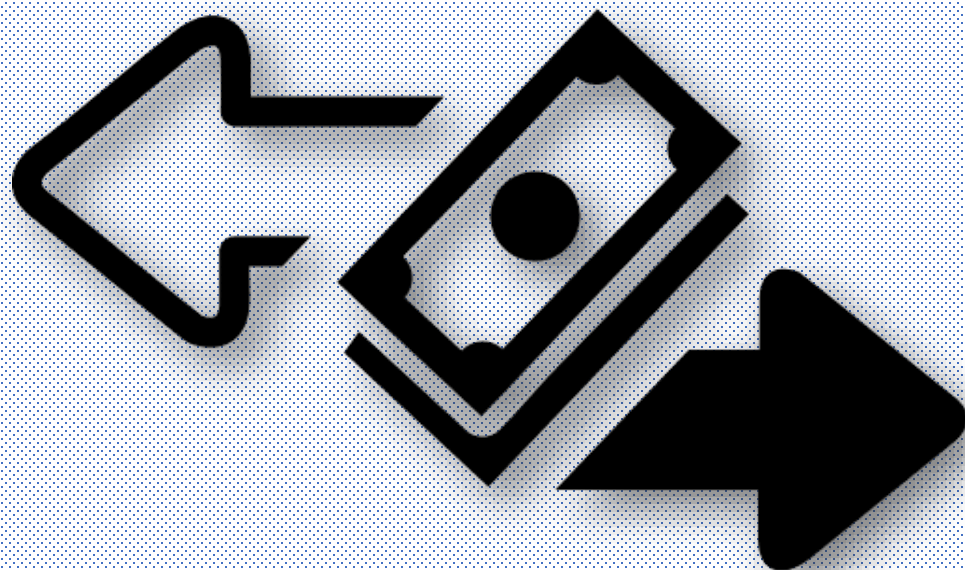

Our platform fosters a vibrant developer network and a decentralized marketplace. We partner with independent talent on AI Oasis to help AI work for your business. Individuals can hire the right tools or talent for their project. AI Oasis has a network of vetted AI developers with a deep understanding of business challenges and cultural nuances to curate user-friendly tools and technology, fosters a sense of inclusivity and attracts a wider developer base.

## TRANSPARENT TRANSACTIONS AND PRICING

Our blockchain technology ensures secure and transparent transactions for all platform activities, building trust and user confidence within our community with clear documentation and support options. We allow developers to set their own pricing models for renting their AI tools. This could be hourly, daily, monthly, or even usage-based pricing depending on the tool's functionality. Additionally, have a review system that allows users provides valuable feedback for developers and helps other users make informed decisions.

## **MAINTAINING QUALITY AND SECURITY**

Our platform implements a thorough vetting process to ensure the submitted tools are functional, well-documented, and meet basic security standards within the platform to protect user data and intellectual property and financial transactions following best practices for Web3 security if the platform utilizes a custom coin.

## SEAMLESS DATA SHARING

Interactions facilitated through data sharing and implementing a secure transaction, transparent pricing, and a strong reputation for quality. Importantly, users maintain control over their data and can choose to share it securely with developers for specific tasks

# ZERO CODING

Required Absence of coding knowledge is not a hindrance. Prebuilt AI tools can be effortlessly accessible using tailored solutions for common tasks like content creation, marketing automation, etc, to cater to specific needs of individuals and businesses. This empowers individuals devoid of coding expertise to unlock their potential via AI Oasis.

# REVENUE STREAMS

AI Oasis offers a tiered subscription plans for access to pre-built automated tool sand charges a rental fee based on the type of AI tool rented, processing power required, and rental duration.

The platform also takes a commission percentage on fees charged by developers to clients through the platform. Additionally, have the AOC token as a utility token for the various platform functionality for payment and unlocking premium features increasing it's revenue streams.
